

## The Cell Signaling in Cancer Conference: From Mechanisms to Therapy

---

### **Organizer Bio: Claus Jorgensen, PhD**

Dr. Claus Jorgensen is a Group Leader at the Cancer Research UK Manchester Institute, United Kingdom. A central interest of the Jorgensen lab is to understand how aberrantly regulated signaling networks drive tumor progression. Specifically, Dr. Jorgensen and his lab is interested in delineating the impact of the tumor microenvironment on tumor cell function and response to therapy in pancreatic cancer.

Dr. Jorgensen obtained his PhD at the University of Southern Denmark in 2005 and then moved to Toronto, Canada for his postdoctoral training with Dr. Tony Pawson at the Samuel Lunenfeld Research Institute.
