

The Folic Acid, Vitamin B12, and One-Carbon Metabolism Conference

Keynote Speaker Bio: Jean-Louis Guéant, MD, PhD, DSc

Jean-Louis Guéant, MD, PhD and DSc in Nutrition, qualified in Hepato-Gastroenterology, is Professor Chair of Medical Biochemistry and Molecular Biology, head of the Department of Molecular Medicine at Regional University Hospital of Nancy and Director of Inserm research department “Nutrition-Genetics-Environmental Exposure” at University of Lorraine, France.

With his team, he has described key mechanisms of digestive transport and metabolism of vitamin B12 and folate, the influence of one carbon metabolism on epigenome, cellular stress, energy metabolism and fetal programming in rare and complex diseases and a B12 inherited disorder named “Epi-cbIC.” He is AGAF of American Gastroenterological Association and member of the French National Academy of Medicine.
